

Eye drop Arranging Filling Capping Labeling Production Line

SiDoLim 600

Brief Introduction

This production line consist of automatic bottle unscramble, bottle washing machine, tunnel type sterilization drier, eye drop filling machine, vertical labeling machine, can complete bottle sorting, water and gas cleaning, drying and ozone disinfection, filling, plugging, capping, labeling, mainly used in eye drops can other small doses of solution, also can be used single independently. Meet GMP requirements.

Its with reasonable structure, higher precision in filling, reaching the advanced level in domestic same business, meet with requirement of GMP standard completely.

Advantage

Automatic bottle unscramble is a newly designed machine, it can arrange disorderly and unsystematic bottle and send them to orbit.

Bottle washing machine has unique structure, which adopting polygonal roller, two times water one time air and three times water two time air or more is optional. Scientific washing process, high cleanliness, low water consumption, simple operation and easy maintenance.

Tunnel Type sterilization drier's heating part and ozone generator are controlled automatically. Complete 100-Class laminar flow [include air inlet and cooling segment] to ensure clean workspace.

Eye drops filling capping machine is a third generation product, human-machine interface operation, filling by peristaltic pump, replace air cylinder with vacuum driven manipulator for plugging, acquired higher stability and percent of pass. Constant torque capping screwing. No bottle no filling, no plug no capping and automatically stop if cap and plug is under-supply.

Specification

Filling volume: 2-30ml

Productivity: 40-60 bottle/min or 70-120 bottle/min

Water pressure: 0.3Mpa

Total water consumption: 0.5m³/h

Clean air pressure: 0.6-0.8Mpa

Clean air consumption: 300L/min

Power supply: 380VAC/50Hz/5.5kw

Dimension: 11000*1500*1900mm
